

# Need Selection Matrix

## Project phase

Experimentation and pathways definition.

## When (Transition Lab Steps)

Needs definition.

## Purpose

This tool is used for listing, categorizing and prioritizing pre-selected needs in order to choose the most pressing innovation need.

## Suggested session duration

Time frame: 2 hours

## How

### GUIDELINES:

Using this tool you can assess in a qualitative way urgency, expected impact and policy relevance

### STEP 1

Create discussion groups and go through each identified need based on the qualitative assessment criteria: *urgency, expected impact, policy relevance*.

### STEP 2

*Revise each need or established priority by analysing the identified opportunities for all of them. Sort the needs in order of relevance based on your discussion.*
