

FAQ

Ostrobothnia

The RIPEET Project has launched three energy innovation territorial challenges and it is now looking for innovative solutions that can tackle them using “Responsible Innovation” processes and methods. This will include following inclusive and participatory approaches during the implementation of these solutions.

For the challenge in Ostrobothnia, RIPEET will award two solutions. Selected European innovators will:

- Co-develop and validate the solution with the challenge promoter
- Receive up to 25 000 € to develop the solution over maximum 12 months

[RIPEET Ostrobothnia](#) is calling European companies to solve the “Energy solutions connecting local resources to local solutions” energy innovation need.

Below are the answers to questions received about the call (this document was last updated on 15.9.2022).
